

Maitri Health – Candid Clean

Hand Sanitizer Everyone Actually Wants to Use.

Gentle on the hands and non-greasy, Candid Clean is a certified safe product. With so many questionable hand sanitizers on the market made from alcohols that are rough on the hands and smell bad, the team at Candid Clean designed a superior blend of quality ingredients and available fragrances.

Candid Clean is a 75% Isopropanol based spray hand sanitizer. A misting spray application results in a longer lasting supply in the bottle.

Candid Clean has a shelf life in the bottle of up to 3 years. Pure, safe and available in a variety of fragrances. Long lasting, gentle on the hands, smells great and certified to keep you safe—Candid Clean.

Candid Clean Hand Sanitizer is part of Maitri Health Technologies' system of products and solutions. Our platform is made up of best of breed materials and technology to keep our world safe today and into the future.
